FLOOR POLISHER

PR 501P
(Dia-20")

High speed polisher is very easy to operate and has different angles of handle adjustment.

It works with a speed of 1500RPM for which the result is quick with an effective cost. Two capacitors and a built-in fan cooling motor with great power are installed inside the machine, which is adjustable to any kinds of floors.

The machine can move with freedom for a perfectly spotless with lower maintenance, while achieving a high gloss surface.
